

4. Student Activity Photos: Please use this opportunity to add your comments to question 3, posting activity photos. (13 responses)

Response

- 1 Great idea.
- 2 I'm not totally sure what this means or entails, but I don't see why not.
- 3 I would be interested in knowing if other schools do this. If so, then it would appear to be a safe practice.
- 4 As long as the students in the photos are in agreement to their posting as well as the parents and are not use for commercial purposes etc
- 5 Omit last names
- 6 If photos are available, I think they should only be able to be opened with a password that is known only by the lakeside families and staff. This would protect our privacy.
- 7 It would be nice for parents who work and can't participate
- 8 You should get specific permission from parents for each picture.
- 9 I would say yes if the students are kept anonymous by not using names and the site is protected.
- 10 Permanent links to activity and date.
- 11 Can we post them through picateers too and get money if people order them?
- 12 I think it is important to show our community our activities.
- 13 We need to be sensitive of the families who do not want their children posted in photos available to the general public.
